2017 Onwards

World will need **HEALERS**
not Pathy Driven Treatments

The Modern allopathic medicine comes with significant benefits and drawbacks. On one hand, it has saved countless lives and improved the quality of life for many. However, on the other hand, it has diminished the quality of lives and cost the lives of many. Based on the outcomes, associated risks, and side-effects, people have now started assessing their options carefully before going ahead with any kind of treatment. Let us try and explore reasons as to why from 2017 onwards world is going to need more healers and not just pathy driven treatments.

FOCUS MORE ON THE SYMPTOM RATHER THAN THE ACTUAL PROBLEM

Holistic healers hold the belief that the visible symptom on the human body, most often is not the actual problem, instead chances are the problem is more global, and that particular part is just showing the vulnerability. Use of medicines, drugs, and surgeries on these symptoms will only suppress the problem instead of curing it completely. This is one of the primary reasons why modern medicine holds the title of disease care and not health care.

SIDE-EFFECTS

Strong drugs and invasive surgeries always pose a threat of side-effects to our bodies such as weight gain, high bold pressure, thyroid problems and more. Prescription error or an overdose of these drugs may even cause deaths.

LESS KNOWLEDGE ON PATIENT

Today, most of the doctors have tight schedules because of which the average time they give to each of their patients is very less, making it easy for them to rush to a diagnosis or miss the whole picture. At the same time, they also do not try to learn more on their patient's nutrition and daily diet. This again leads to the lack of knowledge of the real problem and any success of curing it.

SHIFT IN THE APPROACH

Medicine was invented to cure the disease and illness of people, until recently. Today, the focus of most of the medical practitioners is more inclined towards running expensive tests and prescribing costly medicines. They believe in prescribing medication that sticks longer instead of recommending shorter and precise medication.

For the above-discussed reasons and more, people have now begun looking for alternative cost-effective and efficient therapies and treatments. They believe in holistic healing instead of partial or incomplete healing. Holistic healing is getting popular every day. Holistic Healing through Hypnotherapy, Spiritual therapy, and Sound therapy has proved to be highly effective in healing a lot of human problems such as Anxiety, Depression, Obesity, Chronic Pain as well as many life-threatening diseases such as Cancer.

In the days to come the world will need more holistic healers in place of doctors, which gives all the more important to the courses on holistic healing. Certifications and accreditations in this area today, will definitely prove beneficial to not just the healers but also to the society at large.

CONTRIBUTE TO MANKIND— Become a **HOLISTIC HEALER**

If you help your friend in a difficult situation, you're a healer. If you help them solve their problems, you're a healer. We need as many healers as possible in the world because only then the universe would be completely freed of all the sufferings, pains and diseases.

In the fast-paced 21st century, we really don't look for better alternatives to a problem except for the high-tech super fast solutions that finish the problem for a while, only to cause us more problems in the future.

If you help your friend in a difficult situation, you're a healer. If you help them solve their problems, you're a healer. We need as many healers as possible in the world because only then the universe would be completely freed of all the sufferings, pains and diseases.

In the fast-paced 21st century, we really don't look for better alternatives to a problem except for the high-tech super fast solutions that finish the problem for a while, only to cause us more problems in the future.

HOLISTIC HEALING is that better alternative which would make us free of the disease and eventually make us whole again because the ultimate goal of holistic healing is wholeness; wholeness of the mind and the soul. Holistic health practitioners take a different approach to

the treatment of illness and disease than traditional Western medicine. Holistic medicine tends to focus on the use of herbs, nutrition, and practices such as yoga in order to maintain and treat wellness problems.

Illness occurs when the body is unhealthy. But what is health? Health is the state of being free from illness or injury. There are generally three types of health – physical health, mental health and spiritual health. We usually treat each one separately as though they are not related...for instance; we might see a psychologist for mental health, a doctor for our physical health and a healer for our spiritual health. But is it really possible to separate physical health from mental health from spiritual health? Can we maintain our physical health in the absence of mental health? This question concerned doctors in the past decade which ultimately led to the emergence of spiritual healers and practitioners.

Many studies have shown that the physical symptoms of a disease are only indications of some problem that goes on in an individual's sub-conscious mind. If a person goes through a lot mentally, it is likely that he will be prone to some illness or the other eventually and if a person is sorted mentally, he will be able to fight even the most life-threatening diseases. At the end of the day, the quotation will always stand tall and true- **"Wellness Comes From Within"**

There are many who live for themselves, but only some who live for others. Becoming a healer is no piece of cake rather it requires dedication and the will to help others, the will to keep the well-being of others before you. There are no colleges for pursuing studies in holistic health as the holistic health field is not nearly as standardized as other fields of study. Many other institutes in India and abroad provide courses in holistic healing. In India, one of them is **YATHIS LEARN**. They provide courses in Hypnotherapy and Spiritual Therapy.

Make your lives worth living by helping others make their lives.

Be More Than a **Dr**
Become an **Hr**

A **COURSE** in Spiritual &
HOLISTIC HEALING
has the power to transform your life.

LEARN HOW?

Spiritual Therapy along with other forms of holistic healing techniques is actually the '**Original Medicine**' that humans have used for thousands of years. 'Modern Medicine' was only discovered some hundred years ago. After depending heavily on costly medicines and cumbersome surgeries for quite some time, people have now identified the need for a shift from chemicals to natural & spiritual remedies.

A
HOLISTIC HEALER
not only cures diseases
but relieves **PAIN!**

HOLISTIC HEALING: AN ALTERNATIVE TO MEDICAL SCIENCE

For someone who has just fought a long battle with cancer or any other deadly disease and somehow managed to survive the pain and the therapy, the person spends rest of his life in fear that his disease does not reiterate. Incomplete recoveries from diseases are always a probability after undergoing medical treatments for these treacherous diseases. To add to all this, how can we forget the side effects of these therapies, radiations, surgeries, and medications?

For any kind of healing whether it is physical, psychological, emotional or spiritual, it is important to find out the reason of suffering. A holistic healer's job is to identify the root cause of people's suffering and then address it. Many times the disease reiterates after the medical procedure as medicines only fight the symptoms and doctors do not look for the root cause. Hypnosis & Spiritual Healing is the future as humans are much more than mere physical beings, they have a mind and soul

that needs healing too. It will become a need for people tomorrow. It can be a lucrative career field too.

CAREER IN HOLISTIC HEALING

The greatest medicine of all is to teach people how not to need it. The practice of holistic medicine integrates conventional & alternative therapies to prevent and treat diseases, and most importantly, to promote healthier living. This condition of holistic health is defined as the unlimited and unimpeded free flow of life force energy through body, mind, and spirit. The shift has already begun. What is going to add to this, in the days to come is the number of people opting holistic recovery over incomplete recovery.

People who aspire to heal others from their sufferings & help them recover fully & fast should begin to get trained in these courses today and get the required certifications to do miracles in people's lives. Don't just be someone who cures the symptoms, be the healer who finds the real cause of our problems and makes sure that it never returns.

So learn to look deeper to live happier. We will help you to do that.

Make a **CAREER** WITH **YATHIS**

The United Nations International Labour Organisation (ILO) released its World Employment and Social Outlook Report which stated that unemployment in India is projected to witness marginal increase between 2017 and 2018, signalling stagnation in job creation in the country. In a time where unemployment is on the rise, it has become imperative for people to have numerous degrees, certificates of different part-time and vocational courses, years of unmatched experience and knowledge. People look for alternate career options, just in case they lose their jobs; it is better to be prepared than be shocked at the surprising turn of events in life.

There is a career option open for people from all fields i.e. Holistic Healing. It is very simple with **YATHIS** to become a certified holistic healer. Yathis believes in sharing and spreading the knowledge gained out of years of experience and learning. Holistic healing is a form of healing that heals the mind, body and soul and revolves around making the person complete. Anyone can become a certified holistic healer but there is a silver lining in this field especially for the people who dedicate their lives to help others. Doctors, nurses, masseuses, therapists, psychologists etc can become great healers because they bestow their life seeing the well being of others. Yathis provide online and classroom courses in Hypnotherapy, Spiritual Healing Therapy and Sound Therapy. Most of the courses are certified by the International Hypnosis Association, USA. Yathis prepares you for an exciting career in the field of Hypnotherapy, which is rewarding and satisfying. Almost every holistic healer nowadays charges 3k-5k for every 1 hour session of healing.

You would be able to heal people out of psychological diseases like Depression, Anxiety, Bipolar Mood Disorder, Attention Deficiency Hyperactive Disorder (ADHD) and more; and physical diseases like Paralysis, Cardiac Disorder and even Cancer. There is stability in the field of holistic healing because this alternate form of therapy is very reliable. It's the time of 9 to 5 jobs, cut-throat competition and stressful lives; people are always looking for solutions that could heal them of their nerve-racking disorders so that they can continue striving for success and money. Another important benefit of becoming a holistic healer is the righteousness that comes with it. There is no better satisfaction in the world than being able to help someone in a way that changes their lives.

So, come and make a career with **Yathis Learn** and get on the road to a bright professional life and a rewarding career.
